

**Lisbon Valley Mining Co. LLC
Lisbon Valley Project
Moab, Utah**

Merit are the Project and Construction Managers for this 55 million lbs/yr copper cathode plant in Utah. The civil works started in December 2004 following completion of financing. Most of the equipment was relocated from the Equatorial plant in Tonopah, Nevada.

**Goldcorp Inc.
Red Lake Mine Expansion Project
Balmertown, Ontario**

The sinking of 7200 feet deep #3 Shaft is over 30% complete and scheduled to be complete late in 2006. Merit are providing all Project and Construction Management Services on this fourth project for Goldcorp.

In addition Merit are also managing the associated Material Handling Project that will eventually handle Shaft #3 ore.

**Goldcorp Inc.
Cochenour Wilanour Mine
Cochenour, Ontario**

The bio-reactor is complete and operating. The old Cochenour Wilanour mill is almost dismantled, and the remaining remediation work is being managed by Merit.

**bcMetals Corporation
Red Chris Project
Northern BC**

Merit completed a CAPEX for the project that has been included in the feasibility study.

**Bethlehem Resources (1996) Corporation
Goldstream Plant
Revelstoke, BC**

Merit has completed the second report on the potential for re-opening the old Goldstream Plant. This time as a custom milling facility. The report was published in December and provides the schedule and capital costs. The report should be posted on the SEDAR website shortly.

**Compliance Coal Corporation
Washplant Relocation Project
Princeton, BC**

Merit is the Project Manager for the relocation of the coal processing facilities to the minesite from the old Similco minesite. Activities are ongoing and the plant is scheduled to be back on stream over the next two weeks.

**Falls Mountain Coal Inc.
Willow Creek Coal Project
Chetwynd, BC**

The first coal was discharged into rail cars in mid-December 2004. Merit is the Project and Construction Manager on this very fast track project where all permits, surveys, geotechnical site investigation, design, procurement and construction was done in nine months.

**Eldorado Gold Corporation
Kisladag Gold Project
Turkey**

Merit are the nominated Construction Manager on Phase 1 of the 5 million tonne/yr gold heap leach project in south-west Turkey. Work on the leach pads started in December, and major contracts are being assembled for tendering.

**Corriente Resources Inc.
Mirador Project
Ecuador**

Merit are representing Corriente Resources on the feasibility study for the 25,000 tpd copper processing facility in southwest Ecuador in the Amazon rain forest. Merit's contributions include monitoring the engineering, providing the CAPEX and schedule, and establishing logistics and infrastructure needs.

**Glamis Gold Ltd.
El Sauzal Project
Choix, Mexico**

Merit provided a specialist trade supervisory team to supplement the EPCM contractor to complete the infrastructure and processing facilities - including grinding and filtering installations.

**Redcorp Ventures Ltd.
Tulsequah Chief Project
Atlin, BC**

Merit are providing construction management services associated with updating the feasibility on the 162 km long new access road and site preparation.

**Cumberland Resources Ltd.
Meadowbank Project
Nunavut**

Merit has undertaken a follow-up CAPEX estimate for the project for inclusion in the revised feasibility study.
